

Despite the serious coronavirus situation in Finland and around the world, Durat's production activities continues normally for the time being. Our raw material supply is secure for following months, so at least no immediate problems are in sight. We will inform our customers immediately if our situation changes.

We have developed internal policies to prevent the spread of the virus. We have adopted remote work policy and we are determined to avoid all travel and reschedule all the customer visits or organized them virtual. In addition, we have advised our employees who work on construction sites to check and comply with the specific regulations for each site.
